

President Trump's 25 Most Notable Accomplishments (as of Aug. 2026)

By Rod D. Martin (RodMartin.org)

1. **He made the border a real border again.** In a matter of months, Trump reduced illegal border crossings to their lowest level in half a century.
2. **He reversed mass migration.** America recorded negative net migration in 2025 for (as of Aug. 2026 the first time in at least half a century.
3. **He signed the Laken Riley Act** — and required detention of criminal illegal aliens.
4. **History's biggest drop in violent crime, and the lowest violent crime rate in 126 years.**
5. **He made the 2017 tax cuts permanent...and better.** The One Big Beautiful Bill locked in the largest tax cut in modern history, including the doubled standard deduction, the expanded Child Tax Credit, and 100 percent expensing for factories and equipment. It also delivered No Tax on Tips, No Tax on Overtime, an abolition of most taxes on Social Security benefits, and major relief for seniors. Every Democrat voted no.
6. **He repealed 129 regulations for every new one.** In fiscal 2025, federal agencies finalized 646 deregulatory actions and just five regulatory actions: 129-to-1, and in nearly every case, the "one" was to repeal the others!
7. **He secured \$18 trillion in announced investment commitments.** That's nearly two-thirds the size of the entire American economy, building American factories, chip plants, data centers, energy projects, steel mills, shipyards, and supply chains employing American workers.
8. **He made "reshoring" and "reindustrialization" real,** not just a slogan.
9. **He replaced lopsided trade deals with balanced, reciprocal trade.** Trump used tariffs as leverage to reverse 80 years of lopsided trade deals that favored everyone but America, and to win new or improved agreements with trading partners accounting for more than half of global GDP.
10. **He shifted global energy dominance from the Persian Gulf to the Gulf of America.**
11. **After four decades of nuclear paralysis, Trump brought five new reactors online in a single year.**
12. **He broke the Deep State's power to defy the elected branches.** In Trump v. Slaughter, the Supreme Court ruled for the first time in 90 years that Article 2, Section 1 is still part of the Constitution: The President may fire subordinate officials in the executive branch, overturning the 1935 precedent that insulated "independent" agencies from voters' control.
13. **He ended nationwide injunction abuse.** In Trump v. CASA, the Supreme Court sharply limited nationwide injunctions. A single, local, district judge should not be able to block a national policy for everyone, everywhere; and yet that's exactly what they've done, nonstop, ever since Trump (and only Trump) took office in 2017.
14. **He shut down USAID as a left-wing slush fund and shadow government.** USAID had become a taxpayer-funded machine for exporting abortion, gender ideology, censorship, and left-wing politics.
15. **He shrank Federal employment to its lowest level in 60 years.** From a high under Biden, the federal workforce is now its smallest since 1966.
16. **He expelled DEI from the federal government.**
17. **He defended faith and family, delivering sweeping pro-life reform.** In his first term, Trump delivered the judges that overturned the abominable Roe v. Wade.
18. **He got men out of women's sports, and restored biological reality to federal policy.**
19. **He enacted America's first nationwide school-choice program — and launched Trump Accounts.**
20. **He targeted anti-Christian bias and discrimination.**
21. **He forced NATO to stop freeloading and increase defense spending by 250 percent.**
22. **He drove China out of the Caribbean.** China spent years building strategic beachheads at both ends of the Panama Canal, in Cuba, and in Maduro's Venezuela.
23. **He brokered eight peace deals in just eight months.**
24. **He launched and funded Golden Dome, the first-ever true missile defense for the U.S. population.**
25. **He restored the warrior ethos — and reversed the recruiting crisis.** After years of missed targets under Biden, every active military component met or exceeded its 2025 recruiting goal.
